#AI + #SDG16 + #SDG4 + #SDG17 = ;-) SDGs 2030
AI 4 Peace Education Movement

"If Humanity, the Planet, and the Universe deserve Peace,
Humanity needs Peace Education"

Peace Education is an ethical, useful and necessary tool to help all the Human Beings to develop, for example, Compassion, Love, Joy, and Equanimity toward ALL BEINGS, needed to achieve all the SDGs 2030 Sustainable Development Objectives.

Because Artificial Intelligence AI is the most modern communication and interaction tool, the AI Community has a very important opportunity and role to facilitate, optimize and accelerate the transformation process of Humanity towards Peace, the 16° SDG 2030, to evolve from a knowledge society to the Wisdom Society, during the next 11 years.

The AI 4 Peace Education Movement is a collective action initiative started February 19, 2019, after decades of worldwide R+D in ICTs Innovation, Peace Education and Human Development, did by an experienced multidisciplinary team.

WHY AN AI 4 Peace Education Movement?

In the 21 Century, Humanity needs «Build peace where it starts – in the minds of men & women.», as UNESCO says.

With peace, there will be sustainability for all.

In a short time, billions of Human Beings need to learn to be Compassionate and LOVE ALL BEINGS, to Humanity achieve peace and accomplish all the SDGs 2030.

Peace Education is a useful and necessary tool for the prevention and overcoming of the vicious circle of violence.

For example, annually U$ 4.3 trillion (U$ 4,300,000,000,000) are wasted with the global cost of domestic violence.

Combining the SDGs 16° Peace and 17° Partnerships, we are working to connect all the Communities Worldwide of Artificial Intelligence and Peace Education, to bring a Greater Good to all present and future generations, trying to help Humanity evolves from data, information, knowledge to Wisdom, and from paintings in caverns, papyruses, books, multimedia to AI.

INITIAL PROPOSALS

Promote worldwide the combination of Artificial Intelligence and Peace Education.

We are encouraging all students, professionals, companies, and organizations of the Artificial Intelligence Community to be trained/validated/certified in Culture of Peace and Ethics, becoming an added value to their services and products.

As part of the validation/certification process, they will develop an AI tool for Peace Education, in partnership with an institution promoter of the Culture of Peace. The synergy resulting from this interaction will develop a virtuous spiral to achieve the SDGs 2030.

We will stimulate the AI community allocates 1% of its time and resources to develop and promote AI Peace Education tools.

Just as AI and Machine Learning need Big Data, Human Beings need «Enough Specific Data» to transform the culture of violence into Culture of Peace.

We propose the worldwide simultaneous combination of AI with 4 Human Techs: Collective Intelligence, Collaborative Intelligence, Distributed Leadership, and Chaordics Models.

SOME EXAMPLES

"With the experience of the PAST, in the PRESENT, we build the desired FUTURE."

We are starting to think, promote and develop with AI the next generation of Tools for Peace Education so that each Human Being can find fast and easy, all the specific answers, at each moment, for personal, family and community development.

PeaceEducation.AI will be a synergetic worldwide meeting point for interaction of the AI and Peace Education Communities.
An ecosystem to promote the development with AI of tools for Peace Education and Ethics.
A place where Humanity can find all the tools developed by the members of the Community.
The members can be contacted to develop specific tools.

AI4HT Artificial Intelligence for HumanTech
We propose the worldwide simultaneous combination of AI with 4 Human Techs: Collective Intelligence, Collaborative Intelligence, Distributed Leadership, and Chaordics Models.
What will happen to Humanity in 10 years if each Human Being in any level of formal and informal education learn and apply simultaneously this 4 Human Tech?

AIWoW - Artificial Intelligence Words of Wisdom will be online chatbots so that all Human Beings, regardless of their characteristics, can dialogue about Peace Education with the teachings of each Master of Wisdom of Humanity, in all languages.
Through time and space, Human Beings have always asked questions to try to escape suffering and achieve Happiness. Some of the answers are still useful, necessary and applicable today.

A good and simple example is the possible answer to the question «How should I treat others?» «Treat others as you would want them to treat you.», one of the variants of the Golden Rule of cultures, philosophies, spiritual expressions, indigenous traditions, and religions.

AIWoK - Artificial Intelligence Words of Knowledge will be a similar tool to AIWoW, but with modern texts for Human Development by the philosophy, psychology, sociology, etc For example, there are over 20,000 Books in Kindle Edition for «human development». The NGO Evolutionary Leaders have 48,000 members, for example, Chopra is one of them.

AIWOL - Artificial Intelligence Words OffLine
Will be an offline device with the content of AI-WoW and AI-WoK for free distribution to each refugee and prisoner around the world without Internet access, to help them easily and quickly find responses to the violence them suffer and cause.

AI4PE Game - Artificial Intelligence 4 Peace Education Game will be an online worldwide game for Human Development.
Will be a 365 days gaming with a specific theme each day, starting with International Days and themes of UN; human values; ethical principles, and local or groups celebrations. Will be possible to play in many ways with any device, from the most simple cell phone to a G5 Smartphone, notebooks, and PCs.

MOMENTUM

We are entering the third decade of the 21st Century. Some world leaders refer to it as the Century of the Fraternity.

Neurosciences and AI are reaching everyone. The AI Community on the 21st Century has the opportunity to take a historic step, connecting Artificial Intelligence with Wisdom.

The Education for the Culture of Peace started decades ago and now is beginning a new stage. Today, with measurable results, Peace Education has become law in some countries. But still today it needs innovative and modern tools of communication and education so that in the shortest possible time, educate for Peace ALL Human Beings.

NEXT STEPS

Synergy is key. Applying the 17° SDG, we are connecting to interact with the diverse specific networks of specialists.

Use all the technological and social knowledge of Humanity and high ethical standards.

Applying the 1% FOR PEACE concept www.1forpeace.org could generate sufficient resources for Peace Education. For example, if Humanity invests 1% of the $ 4.3 trillion

wasted annually with global domestic violence, U$43,000,000,000 per year, could generate U$3,600,000,000 monthly for Peace Education.

Humanity has knowledge. The resources exist. We only need determination.

Do we do it together?
